***Allowable Subject Matter***

1. Claims 5, 8-9, 11-14 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the cited references in the previous Rejections disclose the subject matter describes in the independent claims.

During a further search, a couple references have been found. The first is attributed to Hossain et al., US 7395046 B2, which discloses a method during an emergency, monitoring whether the mobile station has received a non-voice service request from the network and, if yes, ignoring the non-service request. Further, during a callback period, monitoring whether the mobile station has received a service request from the network and , if yes, ignoring the service request that is anything but a position location request (see abstract).

Hossain further discloses if there is a page match (or any equivalent mechanism indicating that the network wants to communicate with the MS) and the proposed service option indicates one of the above mentioned services during callback period, MS simply fakes that it did not receive the page or indication from the network and does not send any response back to the network during the Emergency Call attempt period and the Emergency Call Back Mode period.

As can be appreciated from above, neither the page nor the request contains an indicator or a field that indicate to the mobile station or the MSC that the page related to either an emergency related service or a law-enforcement related service.

It is known in the art, as described in the background of the specification that a position request message may contain a field to indicate whether or not the entity

Art Unit: 2617

requesting location services is requesting emergency services; however, the paging message itself does not contain such indicator or field.

Another reference attributed to Suzuki, US 20080032714 A1, discloses a mobile station that receives a page indicating that the page is for an emergency related service. However, due to its filing date, Suzuki is not prior art.

After a thorough search and further examination, claims 5, 8-9, 11-14 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
